1 Nature of operations

EnWave Corporation ("EnWave") was incorporated under the Canada Business Corporations Act on July 14, 1999. The Company's principal business is the design, construction, marketing and sales of microwave-vacuum food and biomaterial dehydration machines that utilize proprietary dehydration technologies developed by the Company.

The registered office of the Company is: 1000 Cathedral Place - 925 West Georgia Street, Vancouver, BC V6C 3L2, Canada.

The Company holds a 51% partnership interest in NutraDried LLP ("NutraDried"), a partnership formed in the United States of America. NutraDried develops, manufactures, markets and sells certain dehydrated food products under the Company's nutraDRIED™ trademark throughout North America. On January 30, 2015, the Company entered into a series of agreements with NutraDried Creations LLP ("Creations"), Lucid Capital Management ("Lucid") and a former director of the Company. These agreements provided for the change of ownership from Lucid to Creations of the 49% interest in NutraDried.

EnWave and NutraDried are collectively referred to as "the Company".

The Company held an 86.5% controlling interest in the shares of Hans Binder Maschinenbau GmbH ("Binder") located in Germany, a manufacturer of conventional dehydration equipment. The principal activities of Binder were designing, manufacturing and selling of conventional dehydration equipment. On September 29, 2015, EnWave ceased to control Binder when Binder filed for insolvency under German insolvency code. As of September 29, 2015, and June 30, 2016 the Company no longer consolidates Binder, as it is no longer able to govern the financial and operating activities or generate returns for the Company (note 4).

2 Basis of preparation

Statement of compliance

These condensed consolidated interim financial statements ("interim financial statements") have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") as applicable to the preparation of interim financial statements, as set out in International Accounting Standard ("IAS") 34, *Interim Financial Reporting*. They do not include all the information required for a complete set of IFRS financial statements and should be read in conjunction with the audited annual consolidated financial statements of the Company for the year ended September 30, 2015. There are selected explanatory notes included to explain events and transactions that are significant to an understanding of the changes in the Company's financial position and performance since the last annual consolidated financial statements as at and for the year ended September 30, 2015.

These interim financial statements were approved for issuance by the Board of Directors for issue on August 25, 2016.

Critical accounting estimates

The preparation of consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates. The Company regularly reviews its estimates and assumptions; however, it is possible that circumstances may arise which may cause actual results to differ from management estimates, and these differences could be material. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Revenue recognition

The recognition of revenue as of the consolidated statement of financial position date requires management to make significant estimates primarily relating to the percentage-of-completion method to determine the amount of revenue to recognize. The stage of completion is measured by reference to the actual contract costs incurred as a percentage of total estimated costs for each contract.

Impairment of inventory

The Company measures inventory at the lower of cost and net realisable value, and in the event the net realisable value exceeds cost, an impairment charge is recorded. This determination requires judgement, which includes among other factors, the selling price, less the estimated costs of completion and selling expenses.

Warranty provision

The Company recognises revenue from the sale of machines to customers. The machine is sold with a manufacturer's warranty valid for a fixed period not exceeding one year. The Company estimates, based on past experience with similar sales, the warranty costs will not exceed 1% of revenues. The Company therefore recognises a provision for warranty equal to 1% of revenue recognized.

3 Significant accounting policies

The accounting policies adopted are consistent with the September 30, 2015 annual consolidated financial statements.

Accounting standards and amendments issued and not yet adopted

IFRS 9 - Financial Instruments

IFRS 9 is tentatively effective for years commencing on or after January 1, 2018, and will replace IAS 39, *Financial Instruments: Recognition and Measurement*. Under IFRS 9, financial assets will be classified and measured based on the business model in which they are held and the characteristics of the associated contractual cash flows. IFRS 9 also includes a new general hedge accounting standard which will better align hedge accounting and risk management. The Company intends to adopt IFRS 9 in its consolidated financial statements for the year commencing October 1, 2018; the extent of the impact of adoption of the amendments has not yet been determined.

(Unaudited, expressed in thousands of Canadian dollars)

IFRS 15 - Revenue from Contracts with Customers

IFRS 15 is effective for years commencing on or after January 1, 2018, and replaces IAS 11, *Construction Contracts*; IAS 18, *Revenue*; International Financial Reporting Interpretations Committee ("IFRIC") IFRIC 13, *Customer Loyalty Programmes*; IFRIC 15, *Agreements for the Construction of Real Estate*; IFRIC 18, *Transfer of Assets from Customers*; and Standards Interpretations Committee ("SIC") 31, *Revenue - Barter Transactions Involving Advertising Services*. The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgemental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. The Company intends to adopt IFRS 15 in its consolidated financial statements for the year commencing October 1, 2018. The extent of the impact of adoption of the standard has not yet been determined.

IFRS 16 - Leases

On January 13, 2016, IFRS 16, *Leases* was issued which requires, among other things, lessees to recognize leases traditionally recorded as operating leases in the same manner as financing leases. The standard is effective for annual periods beginning on or after January 1, 2019 with earlier application permitted. We have not assessed the impact of the new standard.

4 Discontinued operations

On September 29, 2015, Binder filed for preliminary insolvency proceedings under the German insolvency code. As a result of this insolvency filing, an insolvency administrator was appointed by the court to take control of Binder's operations and all power held by the Company was assigned to the administrator. Due to the insolvency, the Company no longer has the ability to control the financial or operating decisions of Binder, and does not have rights to returns from Binder. As a result, it was determined that the Company no longer controlled Binder in accordance with IFRS 10, Consolidated Financial Statements. Binder's operations have been classified as discontinued operations on the consolidated statements of loss, comprehensive loss, and cash flows and are presented as discontinued operations for segmented reporting.

Share issue costs	-	(533)
Balance – June 30, 2016	90,772,759	54,905

(i) On October 22, 2015, the Company completed a private placement of 6,250,000 common shares and 3,125,000 share purchase warrants for gross proceeds of $5,000. The Company incurred share issue costs of $629, of which $550 was cash commission, legal fees and other transaction costs, and $79 was agent's warrants to the underwriter.

c) Warrants

The continuity of share purchase warrants during the nine months ended June 30, 2016 and June 30, 2015 is as follows:

(Unaudited, expressed in thousands of Canadian dollars)

	Number of warrants	Weighted average exercise price $	Fair value at grant date $
Balance – October 1, 2014 and September 30, 2015	2,320,957	1.72	0.18
Issued:			
Investor Warrants (i)	3,125,000	1.20	0.29
Agent's Warrants (ii)	225,000	0.80	0.35
Expired	(2,320,957)	1.72	1.72
Balance – June 30, 2016	3,350,000	1.17	0.30

(i) The fair value of the 3,125,000 warrants (the "Investor Warrants") issued as part of October 2015 private placement was calculated using the Black-Scholes model to be $767. The following assumptions were used in calculating the fair value of Investor Warrants: risk-free interest rate of 0.81%, expected life of five years, estimated volatility of 54.38%, and dividend rate of 0%. Each of the Investor Warrants entitles the warrant holder to convert the warrant into one common share at an exercise price of $1.20, and the warrants expire on October 22, 2020.

(ii) As part of the October private placement, the Company issued 225,000 agent's warrants (the "Agent's Warrants") to the underwriter of the private placement. The fair value of Agent's Warrants was calculated using the Black-Scholes model to be $79, and was included in the share issue costs. The following assumptions were used in calculating the fair value of the Agent's Warrants: risk-free interest rate of 0.52%, expected life of two years, estimated volatility of 54.11%, and dividend rate of 0%. Each of the Agent's Warrants entitles the warrant holder to convert the Agent's Warrant into one common share and one-half of an Investor Warrant at an exercise price of $0.80. The Agent's Warrants expire on October 22, 2017.

d) Stock options

The Company's stock option plan (the "Option Plan") is available to eligible persons, whereby up to 10% of the issued common shares of the Company may be reserved for issuance under the Option Plan. The aggregate number of common shares reserved for issuance to any person within any one year may not exceed 5% of the number of outstanding common shares, on a non-diluted basis.

The exercise price of the options will be determined by the Board of Directors at the time of grant of the options, such price not to be less than the last daily closing price of the Company's common shares prior to the date of grant, less the discount permitted by the policies of the Securities Exchange.

Options issued under the Option Plan will vest in the terms approved by the Board of Directors for each specific grant, except for options granted to individuals engaged in investor relations activities, which must vest over a 12-month period according to the Option Plan.

(Unaudited, expressed in thousands of Canadian dollars)

The changes in options for the nine months ended June 30, 2016 and 2015 were as follows:

	June 30, 2016		June 30, 2015	
	Number of Options	**Weighted average exercise price $**	**Number of Options**	**Weighted average exercise price $**
Outstanding, beginning of period	4,877,500	1.48	5,249,000	1.48

The weighted average fair value of options granted during the nine months ended June 30, 2016 was $0.29 per option (2015 - $0.36).

The following weighted average assumptions were used in calculating the fair value of the stock options granted using the Black-Scholes model for the nine months ended June 30, 2016 and June 30, 2015:

	Nine months ended June 30,	
	2016	**2015**

(Unaudited, expressed in thousands of Canadian dollars)

The Company recorded stock-based compensation expense of $191 (2015 - $231), which includes compensation expense for stock options and for Restricted Share Rights ("RSRs"). The fair value of each option and RSR is accounted for in the consolidated statement of income or loss over the vesting period, and the related credit is included in contributed surplus.

e) Restricted Share Rights:

On March 23, 2015, the shareholders of the Company approved the RSR Plan pursuant to which the Company reserved up to a maximum of 1,000,000 common shares for RSRs. The common shares reserved under the RSR Plan, together with stock options outstanding under the Option Plan, cannot exceed in aggregate 10% of the issued and outstanding shares of the Company.

The changes in RSRs for the nine months ended June 30, 2016 and 2015 were as follows:

	June 30, 2016		June 30, 2015	
	Number of RSRs	Weighted average grant date fair value $	Number of RSRs	Weighted average grant date fair value $
Outstanding, beginning of period	80,000	1.06	-	-
RSRs granted	70,000	0.83	65,000	1.07
RSRs vested	-	-	-	-
RSRs forfeited	-	-	-	-
Outstanding, end of period	**150,000**	**0.95**	**65,000**	**1.07**

During the nine months ended June 30, 2016, a total of $26 (2015 - $6) was recorded to contributed surplus for the RSR's vested during the period. RSRs vest three years from the award date, in accordance with the RSR Plan.

11 Contingencies and commitments

a) Commitments payable to vendors by the Company

The Company has entered into various lease agreements for the rental of office space, plant facilities, and laboratory facilities for lease terms ranging from three to six years and renewable at the end of the lease at market rates. The Company also pays additional rent to cover its share of operating costs and property taxes.

c) Other liability

On December 6, 2010, the Company entered into an Asset Purchase Agreement (the “INAP APA”) to acquire the patents and know-how for the MIVAP™ vacuum microwave dehydration technology. The license covered the US and North American rights. Pursuant to the INAP APA, a portion of the license or royalty fees collected from the Company’s customers who purchase MIVAP® technology is remitted to INAP; in the case of North American food applications the percentage is 25%, and for non-food applications in North American markets is 12.5%. For non-North American usage, the Company remits to INAP 50% of license or royalty fees collected from food applications, and 25% from non-food.

The acquired intangible was recorded at the fair value of the estimated minimum royalty amounts and subsequently at each reporting date at amortised cost less repayments. At June 30, 2016, the remaining discounted balance of the liability is $706 (September 30, 2015 - $1,054) and is payable on an undiscounted basis as follows:

	Undiscounted royalties payable EUR €	Undiscounted royalties payable CAD $

13 Financial instruments and risk management

The Company's cash and cash equivalents, restricted cash, trade receivables, receivable from related parties, trade and other payables, and amounts due from related parties are measured at amortized cost subsequent to initial measurement. Fair value measurement requires classification of financial instruments within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly;

Level 3 - Inputs that are not based on observable market data.

Fair values

The Company's financial assets and liabilities are classified into the following categories:

Cash and cash equivalents	Loans and receivables
Restricted cash	Loans and receivables
Trade receivables	Loans and receivables
Due from customers on contract	Loans and receivables
Receivable from related parties	Loans and receivables
Trade and other payables	Other financial liabilities
Amounts due from related parties	Other financial liabilities
Other liability	Other financial liabilities

The fair value of financial assets and liabilities classified as loans and receivables and other financial liabilities (excluding other liability) approximate their carrying value due to their short-term nature.

The carrying value of other liability as at June 30, 2016 was $706 (September 30, 2015 - $1,054) which approximates its fair value and is recorded at amortized cost. The carrying value of the other liability was determined based on the discounted future cash flows using rates for similar financial instruments subject to similar risks and maturities.

The Company did not have any held-to-maturity or available-for-sale financial instruments, nor did it acquire or hold any derivative products during the nine months ended June 30, 2016 or year ended September 30, 2015. The Company has no financial instruments measured at fair value.

Financial risk factors

The use of financial instruments exposes the Company to a number of risks. These risks include credit risk, liquidity risk, and market risk. The Company has established policies and procedures to manage these risks, with the objective of minimizing the adverse effects that changes in the variable factors underlying these risks could have on the Company's consolidated financial statements.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligation under a financial instrument or customer contract, leading to a financial loss being incurred by the Company. Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents, restricted cash, trade receivables, and due from customers on contract. The Company mitigates its exposure to credit loss by maintaining cash balances with major Canadian financial institutions.

The Company provides credit to its customers in the normal course of business and, as such, has exposure to credit risk in relation to the collection of trade receivables. Prior to issuing credit, management reviews the customer, taking into account its financial position, historical experience, and other factors. The Company minimizes its credit risk associated with trade receivables by maintaining ongoing close contact with customers, by requiring commercial letters of credit, and by reviewing individual account balances, and proactively following up on overdue amounts. The Company maintains an allowance for doubtful accounts relating to specific losses estimated on individual exposures. As at June 30, 2016, the Company has recorded an allowance for doubtful accounts of $nil (September 30, 2015 - $289).

The Company is exposed to credit risk in trade receivables by way of concentration of credit with a small number of customers. The Company determines its concentration of credit risk if the balance is more than 10% of total revenue or trade receivables. The Company expects these customers to remain as large customers in the future. Significant change in these customer relationships could materially impact the Company's future financial results. The Company seeks and ordinarily obtains progress advances in respect of its construction contracts. The maximum exposure to loss arising from trade receivables is equal to their total carrying amounts.

(Unaudited, expressed in thousands of Canadian dollars)

The following table provides information regarding the aging of trade receivables as at June 30, 2016:

	Neither past due nor impaired	Past due but not impaired		
	0 - 30	31 - 90	91 - 365	Over 365
Trade receivables	273	155	-	-
Due from customers on contract	2,084	-	-	-
Other receivables including related parties	433	-	-	-
	2,790	155	-	-

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due.

The Company manages liquidity risk through ongoing management and forecasting of cash flows, budgeting, and equity financings. Cash flow forecasting is performed to monitor cash requirements and to manage capital management decisions. Such forecasting takes into account current and potential customers, contractual obligations and the Company's technology development and commercialization expectations.

The Company's investment policy is to invest its cash in highly liquid short-term interest bearing investments with varying maturities selected with regards to the expected timing of expenditures from continuing operations.

The Company ensures that sufficient funds are raised from private placements to meet its operating requirements, after taking into account existing cash. The Company manages liquidity risk through the management of its capital structure and financial leverage. At June 30, 2016, the Company had cash and cash equivalents of $5,733 to settle current liabilities of $2,594.

Market risk

Market risk is the risk that the fair value of future cash flows of the Company will fluctuate due to changes in interest rates and foreign currency exchange rates.

Interest rate risk

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instrument will fluctuate due to changes in market interest rates. The Company is exposed to interest risk from the interest rate impact on cash and cash equivalents and restricted cash. The Company earns interest on deposits based on current market interest rates, which during the nine months ended June 30, 2016 ranged from 0.65% to 1.40%. A 1% change in interest rates would affect the results of operations by approximately $28 (2015 - $21).

The Company pays interest on certain amounts payable to related parties. The interest rates are fixed and the Company considers the interest rate risk to be low.

Foreign exchange risk

The Company is exposed to the following foreign exchange risks related to the fluctuation of foreign exchange rates:

(i) The Company operates in the United States and a portion of its expenses are incurred in US dollars and Euros;

(ii) The Company is exposed to currency risk through its other liability comprising minimum royalties denominated in Euros;

(iii) The Company is exposed to currency risk through an increasing number of customers with contracts denominated in US dollars;

(iv) The Company purchases machine parts from European suppliers and is exposed to currency risk as a portion of its expenses are incurred in Euros.

A significant change in the currency exchange rate of the Canadian dollar relative to the US dollar and Euro currencies could have an effect on the Company's results of operations. As at June 30, 2016, all of the Company's liquid assets and liabilities were held in Canadian dollars and US dollars. The Company has not hedged its exposure to currency fluctuations.

A change in the value of the Canadian dollar by 10% relative to foreign currencies the Company is exposed to would have affected the Company's income for the period as follows:

Currency	2016 $	2015 $
US dollar	323	21
Euro	95	34

Capital management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern and to maintain a flexible capital structure which optimizes the cost of capital at an acceptable risk.

In the management of capital, the Company includes the components of equity attributable to common shareholders. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares, issue debt and acquire or dispose of assets. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

There were no changes in the Company's approach to capital management in the period. Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.
